

AniShinSei

AI Engineer & Python Developer

anishinsei.dev

github.com/anishinsei-343030

t.me/Anishinsei

Building anime-inspired AI companions, autonomous agents, and intelligent software. Passionate about turning imagination into reality with Python, AI, and creative engineering.

SKILLS

AI & ML

- Python
- LLM Fine-tuning
- RAG Pipelines
- AI Agents
- Voice AI
- Prompt Engineering

Development

- Python
- JavaScript
- Git
- Linux
- Automation
- Game Dev

Web

- HTML/CSS
- JavaScript
- Full-Stack
- 3D Web
- Responsive Design

PROJECTS

Wilder

2026

HTML, CSS, JavaScript

- A cinematic nature experience — immersive journey through Earth's landscapes
- Built with pure HTML, CSS, and JavaScript featuring smooth scrolling and atmospheric design
- Responsive visuals with parallax scrolling effects and dynamic navigation

AniShinSei Portfolio

2026

HTML, CSS, JavaScript

- Interactive 3D flipping-book portfolio design with CSS 3D transforms
- Zero-dependency architecture — no frameworks, no build tools
- Animated starfield background, responsive layout, and tactile page-turn interactions

EXPERIENCE

AI Engineer / Freelance

2024 — Present

- Developing custom AI solutions integrating LLMs for client-specific use cases
- Building autonomous agent systems and workflow automation pipelines
- Creating interactive AI-powered applications and game prototypes

EDUCATION

Computer Science / AI

Ongoing

- Self-directed study in machine learning, NLP, and AI system architecture
- Active participation in AI developer communities and open-source projects
